

Cherryworks is proud to announce that we are a certified SBE contractor.

The Maryland Department of Transportation (MDOT) recently launched a new gender and race neutral Small Business Enterprise (SBE) program to provide contracting opportunities for small businesses on federally funded projects with the State Highway Administration, Maryland Transit Administration and Maryland Aviation Administration.

The SBE program seeks to create those opportunities by promoting competition and eliminating obstacles for small businesses to participate in contracts as a prime contractor without competing with larger well-established businesses.
